Ryan and Burt, this is your introduction!

Burt is our ecological risk assessor working on the sampling and analysis plan for Discovery Bay. He will call you today to discuss some details needed to finish the draft plan. Ryans phone is (b) (6)

Thanks, Brenda

Hi Brenda,

I just wanted to check in with you and see if you are still planning to run the oyster seed experiment at our facility this Fall.

Hope you're doing well,
Ryan

Hi Ryan,

As per our discussion, I will be at the lab between 9:45-10:30 to check in with you. Yes, this grower has Pacific oysters so the question to be assessed is whether your lab can grow seed pacific oyster sufficient to run Toxicant Identification Evaluations. EPA is unable to do so in its lab. This entails multiple steps that we can provide in a formal plan but for now, you can peruse these sites as a sleep aid:

Hi Brenda,

I'd be happy to chat about oysters anytime. Send me a message or feel free to call, (b) (6)

Best,

Ryan

Hello Brenda, I would suggest starting with Ryan Crim, cc'd here. If he can't answer your question he may be able to point you to someone who can.

Hi Brenda,

Barry Berejikian is the manager at the NMF research facility at Manchester.

Barry, Brenda is one of our Unit Mangers here. She had a call today regarding an oyster mortality issue in Puget Sound and would perhaps like to get access to one or more of your scientists (or colleagues) with expertise in this area. I figured that with the new oyster facility, you might have a good suggestion or two.

Thanks,

Barry
